INNOVATION AND CAPACITY BUILDING ON DRY-CONSTRUCTION SYSTEMS

A STEP FORWARD TO THE EUROPEAN EDILTROPHY 2026

The European Ediltrophy, led by Formedil Italy, promotes the use of dry-construction systems along with related vocational competences to specifically address the gap at the European level in terms of knowledge and capacity development of workers in these innovative techniques.

The project intends to:

- develop innovative training programmes for workers, technicians and designers, adaptable to different national contexts;
- promote the use of digital and new technologies in design and construction;
- test the EdiTrophy Gaming as a new training methodology;
- promote social inclusion through the involvement of disadvantaged groups;
- strengthen the cooperation among training entities, private companies and public authorities.

PARTNERS MEETING IN BARI: WHEN THE PROJECT MEETS THE SAIE AND THE EDILTROPHY GAMING

In October the EDILTrophy partners meeting gathered in Bari, Italy under Formedil coordination, at the side of the Exhibition of the Building industry -SAIE

Discussions focused on the state of play of project implementation.

During their visit, the project partners had the chance to observe the roll-out of the EDILTrophy, the national gaming of workers organized by Formedil. They learnt about the organizational aspects and logistics as well as the competition rules. The same are meant to inform the next European EDILTrophy 2026.

This experience allowed the partners to discuss on how to best adapt this gaming model at the European level, promoting professional competences through a common approach to the capacity development within the construction industry.

WP2 – INNOVATIVE TRAINING ON DRY-CONSTRUCTION SYSTEMS

Work Package 2 is focused on the development of pilot training programmes on dry-construction systems as a result of partners joint effort.

Two training programmes have been designed:

- 1) for workers, based on interactive training methodology promoting a practical approach
- 2) for designers, based on technical aspects promoting the use of digital tools

Both programmes include demonstration video on the use of proposed tools and techniques.

The pilot phase will run from November 2025 to January 2026, followed by a validation phase on January – February 2026 to customize contents at the national level.

WP3 – NATIONAL COMPETITIONS AND THE EUROPEAN EDILTROPHY

Work Package 3 is underway with preparations for the gaming competition of workers and technicians at the partner country level.

Formedil will supervise technical data sheets development, including roll-out modalities and organizational aspects so as to ensure a uniformed approach ahead of the European Ediltrophy 2026.

Ongoing activities represent the core of the project combining training, innovation and talent development, while laying the foundations of a European network promoting coordination on dry-construction systems.
